About Us

Adding Fun to your Life!

It all started in 2018, when a small team of game lovers who were also passionate about programming and creative arts decided to start a gaming studio. With a wide range of experience in the service industry, Hashbyte Studio curates products passionately with an innovation hunger to set new trends amongst the high pace evolving Design and Engineering industry.

Hashbyte handles projects with client's vision as a major guideline adding major boosts to have the product a leading edge in the industry. With a keen passion to be updated with the design and technology, Hashbyte doesn't just do different things but do them differently as well.

🚀 Our Mission

"Create Games that users love to Play."

🔭 Our Vision

"To become the best Game development company in India."

Our Services

Game Design and Development

User Experience and Interface

Animation and Motion Graphics

2D Design and Concept art

Top Game Features

Different Game modes

Created 3 different game modes: Pass and Play,
Player vs AI
& Multiplayer

Artificial Intelligence

Integrated Easy, Medium and Hard AI using
Machine learning approach.

Interactive Tutorial

Integrated an Interactive tutorial for easy
understanding of the game.

evolution

Genre: Nintendo Switch game

About:

Developing the switch version for Evolution was quite challenging as it was different from the PC and mobile versions. We had to convert the entire game to the joystick mode. However, the framework for the switch was similar to that of the mobile version which was helpful in designing the gameplay.

The Joy-Con includes two individual units, each consisting of an analog stick and an array of buttons.

3d Weapons & Vehicals

The high and low detailed 3D weapons like guns, swords and bazooka created for our games.

The high detailed 3D model of a military's jeep where the modeling and texturing is done in 3d Maya and rendered using Arnold for lighting and rendering.

Discover Our Extraordinary NFTs

NFT means non-fungible tokens, which are generally created using the same type of programming used for cryptocurrencies. In simple terms these cryptographic assets are based on blockchain technology.

The Mafia Cat
#3234

The Bratva   ETH 2.5

NFTS

Each NFT is unique and randomly generated upon the minting process - including backgrounds, headwear, mouth props, and more.
Graphic Design

The art and practice of planning and projecting ideas and experiences with visual and textual content. Graphic design communicates certain ideas or messages in a visual way. These visuals can be as simple as a business logo, or as complex as page layouts on a website. It helps the producer to connect with the consumer. It conveys the message of the project, event, campaign or product.
